# **New Image Cosmetic Surgery San Diego**

Within last decade; the demand for the cosmetic surgeries has gone up. No longer an indulgence for the rich, this operation is now freely accessible to even middle class citizens in America. Recent statistics also show a steady growth in the amount of people that are looking for cosmetic surgery to change their appearance. Cosmetic surgeries do not only change one's physical appearance. The [san diego cosmetic surgery](#) centre guarantees for the psychological transformation that emerges within a person such as the uplifting of one's self esteem. This can in fact switch not only a person's outlook on life but also change their lives as a whole.

With their fully qualified staff, San diego cosmetic surgery clinics meet the demands of their clients. The operations that are undertaken by the san diego cosmetic surgery centers are liposuction and power assisted liposuction, lip and breast augmentation and eye brow and face lifts. The san diego cosmetic surgery clinics also specialize in rhinoplasty; more usually referred to as nose job, otoplasty; ear, endermologie; Botox and many more. The san diego cosmetic surgery center in Mission Bay also promotes the new FDA approved Artefill. This is more conversationally referred to as a permanent filler and lip augmentation operation. The san diego cosmetic center in La Jolla is proud to boast of the 2007 workplace excellence award and were referred to as the best cosmetic surgery practice by the Union Tribune readers in San Diego.

When considering the san diego cosmetic surgery center it is crucial to know that Sassan Alavi, MD (Cosmetic surgeon and medical director), specializes in every form of plastic surgery and is a reputed surgeon. The san diego cosmetic surgery centers also provide clients with appropriate consultation in order to help determine the fitting cosmetic surgery that should be performed and what best suits the client's desire. Thereby the below precautions are advised to clients beforehand.

Knowing full well the physiological and emotional benefits that can be brought about through subtle and necessary cosmetic surgery, the [cosmetic surgery in san diego](#) centers do not ignore the terrible effects that occur if and when a client gets carried away. Once a patient undergoes a surgery, there is a possibility that they keep coming back for needless procedures. Thereby it is crucial to seek psychological help beforehand. This should be done to discover if one is in the first stages of acquiring body dysmorphic disorder. This is a disorder where the patient's body image is so distorted in their minds that they keep receiving continuous and unnecessary cosmetic surgical operations to remedy their evident disfigurements.
